

# Coronial Toxicology User Survey 2024

## About You

Responses were received from Bath, Yeovil, Dorset and Somerset

Please tell us whether you agree or disagree with the following statements:

Very helpful service. Pleasant staff and available for advice as needed. Good TATs

TAT is good.

Thank you for your responses and comments. It's good to know we are providing a service which is fit for purpose.

**It would be good to have normal ranges with  
abnormals in red**

It would be difficult to do this consistently, as many drugs do not have well-defined therapeutic ranges.

In response to feedback, however, we will try and ensure that interpretative comments in complex cases clearly highlight the most significant findings.

**Any further comments or suggestions?**

**Keep up the helpful and good work  
for the toxicology service please!**
