Reference Range reviewed from April 2023 due to change in equipment to Werfen ACL TOPs 750.

Adult ranges were verified and adapted from the manufacturer's reference range (Werfen)

Paediatric ranges were adapted from the following study:

Toulon P, Berruyer M, Brionne-François M, Grand F, Lasne D, Telion C, Arcizet J, Giacomello R, De Pooter N. Age dependency for coagulation parameters in paediatric populations. Results of a multicentre study aimed at defining the age-specific reference ranges. Thromb Haemost. 2016 Jul 4;116(1):9-16. doi: 10.1160/TH15-12-0964. Epub 2016 Mar 17. PMID: 26988943.

**PLEASE NOTE:** Results for infants 0-14 days should be interpreted with caution, as the study above did not include this age group.

D-Dimer: Change in unit of reporting from µg/mL to µg/L (age-adjusted range still applies)
